

Hellefoss Book Paper, Committed to a Sustainable Future

Hellefoss Book Paper AS is committed to address any high-risk environmental issues identified via our risk assessment, including any de facto high-risk issues, that we cause, contribute, or are linked to via our business relationships, including, employees, customers, suppliers, collaborators, local communities, and potentially affected groups, and other relevant stakeholders.

Our Commitment:

- Reducing our Environmental Footprint: We are committed to minimizing our impact on the environment, including greenhouse gas (GHG) emissions, through efficient production processes, reduced waste, and responsible resource use.
- Driving Innovation: We are investing in innovative technologies to develop sustainable products and reduce our carbon emissions.
- Collaborating for a Better Future: We collaborate with suppliers, customers, and communities to promote sustainable practices throughout our value chain.

Our Actions:

- Sustainable Sourcing: We prioritize sourcing raw materials from responsibly managed forests and other sustainable sources.
- Circular Economy: We are actively working to reduce, reuse, and recycle materials to minimize waste and conserve resources. Includes all use of process water.
- Climate Action: We are taking small steps to reduce our greenhouse gas emissions and transition to a low-carbon future.
- Biodiversity Conservation: We are taking steps to improve effluent water, and soil and air quality to protect biodiversity and preserve ecosystems.

By embracing sustainability, we are strengthening our business. We believe a sustainable future is a prosperous future.
